

HAMIDREZA HEZARI

Niavaran, Tehran, Iran | [Tel](#) | [Email](#) | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

SUMMARY

Senior Frontend Engineer with **6+ years of experience** designing and building scalable web applications, frontend architectures & high-performance user experiences. Deep expertise in JavaScript and React internals, rendering behavior and modern web performance optimization, with a strong focus on scalability, maintainability, developer experience and long-term product evolution.

CORE SKILLS

- **Stack:** Next.js, React.js, TypeScript, JavaScript, HTML5, CSS3, Tailwind CSS
- **State Management:** Zustand, Context, Apollo, React Query, State Machines
- **Performance:** Multi-layer Caching, Lighthouse, React Profiler, Pre-fetching, Core Web Vitals, Code splitting, Virtualization, Web Workers API
- **CS:** Data Structure & Algorithms, Big-O
- **Data Layer:** GraphQL, REST APIs, WebSockets
- **Architecture:** Feature-based, Modular, DDD, FSD, Design patterns, Atomic Design, Nx Mono-repo
- **Render Patterns:** CSR, SSR, SSG, ISR, PPR, RSC
- **Tooling:** Git, ESLint, Storybook, Zod, MUI, Docker, Webpack, Vite, React Hook Form
- **Other:** PWA, SEO, Accessibility, Testing Trophy, Browser Storage, Swagger, Claude Code, Cursor

WORK EXPERIENCE

Senior Frontend Engineer | [XPay Exchange](#).

Tehran, IR (2026 – 2026)

- Re-architected the exchange application with React, TypeScript, and a modular architecture, simplifying critical user flows and improving conversion by 15% in a month.
- Modeled critical transaction and verification flows with state machines, making complex user journeys predictable and easier to test.
- Hardened application security with authentication, RBAC, CORS, rate limiting, session security, input validation (Zod), and strict API boundary controls.
- Engineered the client-state and data layer with TanStack Query (optimistic updates, background synchronization, multi-layer caching) for fast, consistent real-time data.
- Architected a headless Next.js platform integrating WordPress CMS with .NET APIs, reaching 95+ Lighthouse scores and improving Core Web Vitals and SEO rankings. This combines my CMS and SEO roots with senior-level architecture.
- Designed the rendering and delivery strategy (ISR, SSR, revalidation, prefetching, caching) for high-performance content delivery.
- Used AI-assisted engineering (Claude Code, Cursor) to accelerate large-scale refactoring, design-system integration, and complex migrations.

Lead Frontend Engineer | [Actimeety Co.](#)

Dubai, UAE (2023 – 2026)

- Led frontend architecture and delivery for a real-time social activity platform (feed discovery, activity creation, profiles, following, messaging, maps, tags, comments, partner matching), owning technical decisions from planning to production.
- Architected a Next.js, React, and TypeScript codebase in an Nx monorepo using feature-based modular architecture, with a planned migration path to FSD and micro-frontends.
- Designed a hybrid rendering strategy: PPR/SSR for feed and layout surfaces, CSR for real-time messaging, and dynamic imports for heavy areas, balancing SEO, load time, and interactivity.
- Built real-time features with Apollo GraphQL and WebSockets (chat, live updates, social interactions), using cache normalization and optimistic UI.

- Improved performance with virtualization, lazy loading, bundle splitting, debouncing, & selective hydration.
- Built a reusable design system on MUI, documented in Storybook, using compound-component, recursive-component, and component-splitting patterns.
- Implemented complex multi-step flows with React Hook Form, Zod, Zustand, and Context, keeping component-level and global state cleanly separated.
- Set engineering standards (code review practices, ESLint rules, an integration-first Testing Trophy strategy) and managed 2 other developers.
- Delivered a mobile-first PWA and worked with UI/UX and backend teams on API contracts & product flows.

Frontend Developer | Beranus Co.

Tehran, IR (2020– 2022)

- Moved from CMS-based builds to React applications, delivering e-commerce storefronts, corporate platforms, and admin dashboards across multiple agency client projects.
- Delivered pixel-perfect, responsive UIs from design handoff, consistent across browsers and devices and aligned with accessibility standards.
- Modernized legacy frontends into reusable component architectures with shared utilities and style variables, improving maintainability and reducing duplicated code.
- Owned Core Web Vitals and performance budgets; fixed memory leaks with event delegation and proper side-effect cleanup, improving runtime performance on interaction-heavy sites.
- Integrated REST APIs and third-party services with consistent error handling, loading states, and data integrity across applications.
- Built validated, accessible form and checkout flows, reducing user errors and drop-off by 30%.

Web Developer | BartarWeb Co.

Mashhad, IR (2019 – 2020)

- Designed wireframes, user flows, and Figma prototypes for multiple business and marketing websites, turning client goals into clear user journeys and conversion-focused layouts.
- Built and customized WordPress sites (custom themes, page builders, plugins, WooCommerce stores) with HTML5, CSS3, and JavaScript, delivering responsive, cross-browser results.
- Implemented technical SEO: semantic HTML, metadata, schema markup, sitemaps, and clean URL structures, improving organic visibility and search rankings.
- Improved page speed and early Core Web Vitals through image optimization, lazy loading, and removal of render-blocking resources.
- Supported digital marketing campaigns with landing pages, Google Analytics and Tag Manager tracking, and A/B-tested CTAs, tying design decisions to lead-generation metrics.
- Worked directly with clients on requirements and deadlines, building the product and business sense that shapes my engineering decisions today.

EDUCATION & CERTIFICATES

Bachelor of Science: Architecture	Islamic Azad University (2014–2018)
Claude AI	Anthropic
Next.js App Router	Vercel
The Ultimate React Course: React, Next.js, Redux	Udemy
Advanced React Design System, Design Patterns, Performance	Udemy

PERSONAL INFO

Age	30 years old
Languages	Persian (native) / English (advanced)
Marital Status	Single
Military Service Status	Completed
