

HAMIDREZA HEZARI

Niavaran, Tehran, Iran | [Tel](#) | [Email](#) | [LinkedIn](#) | [GitHub](#) | [Portfolio](#)

SUMMARY

Senior Frontend Engineer with **6+ years of experience** designing and building scalable web applications, frontend architectures & high-performance user experiences. Deep expertise in JavaScript and React internals, rendering behavior and modern web performance optimization, with a strong focus on scalability, maintainability, developer experience and long-term product evolution.

CORE SKILLS

- **Stack:** Next.js, React.js, TypeScript, JavaScript, HTML5, CSS3, Tailwind CSS
- **State Management:** Zustand, Context, Apollo, React Query, State Machines
- **Performance:** Multi-layer Caching, Lighthouse, React Profiler, Pre-fetching, Core Web Vitals, Code splitting, Virtualization, Web Workers API
- **CS:** Data Structure & Algorithms, Big-O
- **Data Layer:** GraphQL, REST APIs, WebSockets
- **Architecture:** Feature-based, Modular, DDD, FSD, Design patterns, Atomic Design, Nx Mono-repo
- **Render Patterns:** CSR, SSR, SSG, ISR, PPR, RSC
- **Tooling:** Git, ESLint, Storybook, Zod, MUI, Docker, Webpack, Vite, React Hook Form
- **Other:** PWA, SEO, Accessibility, Testing Trophy, Browser Storage, Swagger, Claude Code, Cursor

WORK EXPERIENCE

Senior Frontend Engineer | [XPay Exchange](#).

Tehran, IR (2026 – 2026)

- Architected a headless Next.js platform integrating WordPress CMS with .NET application APIs, achieving +95 Lighthouse scores across pages and significantly improving Core Web Vitals and SEO rankings.
- Designed advanced rendering and delivery architecture using ISR, SSR, revalidation, prefetching, and multi-layer caching for high-performance content delivery.
- Re-architected the exchange application with React, TypeScript, modular architecture, and modern frontend patterns, optimizing performance and simplifying critical user flows to improve conversion.
- Hardened FinTech application security with authentication, authorization/RBAC, CORS, rate limiting, session security, input validation, and API boundary controls.
- Engineered scalable client-state and data layers using TanStack Query, optimistic updates, background synchronization, and caching.
- Leveraged AI-assisted engineering to accelerate large-scale refactoring, design-system integration, and complex frontend migrations.

Lead Frontend Engineer | [Actimeety Co.](#)

Dubai, UAE (2023 – 2026)

- Led frontend architecture for Actimeety, a social activity platform supporting real-time feed discovery, activity creation, user profiles, following, messaging, maps, tags, comments, and partner-finding workflows.
- Built a scalable Next.js/React frontend inside an Nx monorepo, using feature-based architecture with a migration path toward FSD and future micro-frontend adoption.
- Implemented hybrid rendering patterns using PPR/SSR for feed and layout surfaces, CSR for real-time messaging, and dynamic imports for performance-sensitive areas.
- Integrated Apollo GraphQL and WebSocket for real-time chat and interactive social workflows.
- Optimized performance with Virtualization, lazy-loading, bundle splitting, debouncing, & selective hydration.
- Built complex forms and multi-step flows using React Hook Form, Zustand, Context API, reusable hooks, and component-level state separation.
- Created a reusable UI system by customizing MUI, documenting components in Storybook, and applying compound-component, recursive-component, and component-splitting patterns.
- Delivered a mobile-first PWA experience while collaborating closely with UI/UX and backend teams on API contracts, product flows, and scalable frontend delivery.

Frontend Developer | Beranus Co.

Tehran, IR (2020– 2022)

- Delivered responsive and pixel-perfect UIs across multiple client projects while maintaining consistency across browsers and devices.
- Modernized legacy frontend applications, improving maintainability, scalability and performance.
- Improved developer productivity and experience through reusable component patterns, shared utilities and style variables.
- Managed Core Web Vitals and performance budgets; utilized Event Delegation and optimized Side Effect handling to fix memory leaks and improve runtime performance on interaction-heavy sites.
- Built reliable integrations with backend services and external APIs while improving error handling and data consistency across applications.
- Developed scalable form experiences with improved validation, usability and accessibility standards.

Web Developer | BartarWeb Co.

Mashhad, IR (2019 – 2020)

- Designed user-centered digital experiences by transforming business goals and user needs into intuitive interfaces and customer journeys.
- Created wireframes, user flows, prototypes and visual systems that improved usability and conversion-focused decision making.
- Improved organic visibility and website discoverability through technical SEO initiatives and search performance optimization.
- Improved website performance and Core Web Vitals metrics through performance-focused design and implementation decisions.
- Delivered responsive marketing websites and business platforms while balancing usability, aesthetics and business objectives.

EDUCATION & CERTIFICATES

Bachelor of Science: Architecture

Islamic Azad University (2014–2018)

Next.js App Router

Vercel

The Ultimate React Cours: React, Next.js, Redux

Udemy

Advanced React Design System, Design Patterns, Performance

Udemy

PERSONAL INFO

Age

30 years old

Languages

Persian (native) / English (advanced)

Marital Status

Single

Military Service Status

Completed
